## Experience

- Finance Magnates** • **Project Manager**  
 Jul 2024 – Today  
 Responsible for managing the company's project portfolio, including overseeing the planning, execution, and closure of all projects. Collaborating with all departments to gather and analyze requirements, working closely with the technical project manager to refine and prioritize them for the product backlog. Documenting and optimizing processes and procedures across departments to enhance efficiency and alignment.
- PLUGIT** • **Project Manager**  
 Oct 2020 – Feb 2023  
 Responsible for managing the development team's project lifecycle, including planning, execution and release phases. Collaborated with account management, support, and sales teams to gather, refine and prioritize requirements for the product backlog. Preparing all technical documentation, including product, API and release notes. Assisting in the project management of the design team to ensure that both business and product design tasks were prioritized and implemented effectively.
- PrimeXM Services** • **Head of Client Projects & Onboarding**  
 Oct 2017 – Jan 2019  
 Responsible for developing and implementing the processes and procedures to ensure a successful customer launch. Managing the project management of all client projects. Leading a cross-functional team responsible for the client on-boarding process which includes KYC, agreements, technical setups, training, and support.
- Point Nine Financial Technologies** • **Client Success Director - Project Manager / Business Analyst / Product Owner**  
 Dec 2014 – Jun 2017  
 Responsible for the on-boarding of Middle and Back-Office clients and handling the required business analysis, product, and project management. Preparing the specifications and overseeing the implementation and testing of new features in our operations platform and serving as the main link between users, clients, and developers.
